

CHROMEBOOK CAPTURE

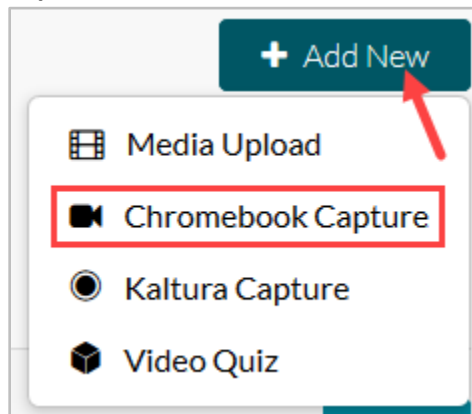

Chromebook Capture is a web-based webcam and audio recording system for Chromebook users. Unlike Kaltura Capture, no software needs to be downloaded to use Chromebook Capture.

Instructions

1. In a content area, click the down arrow for **Add Collaboration Tool** and select **Kaltura Media**.

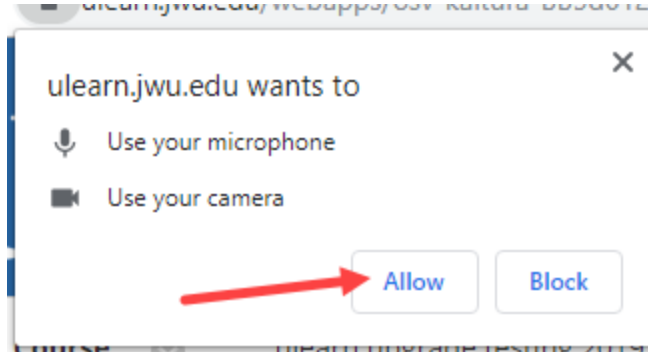

2. Click the icon for **Add New**, found in the upper right corner, and select **Chromebook Capture**.

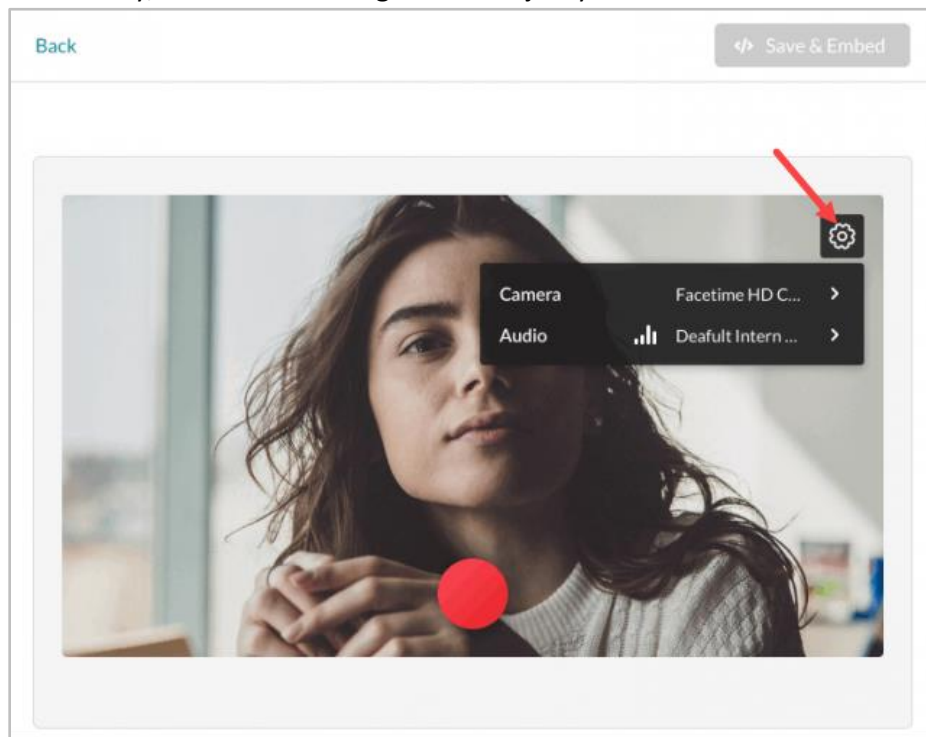

CHROMEBOOK CAPTURE

3. Select **Allow** to grant access to your computer's microphone and camera.

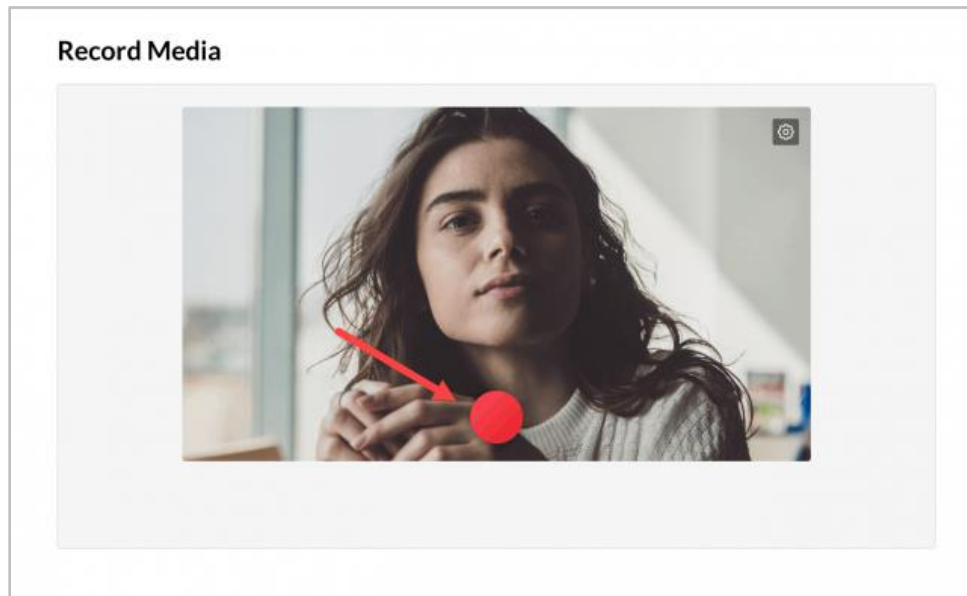

4. If necessary, click on the **Settings** icon to adjust your camera and audio devices.

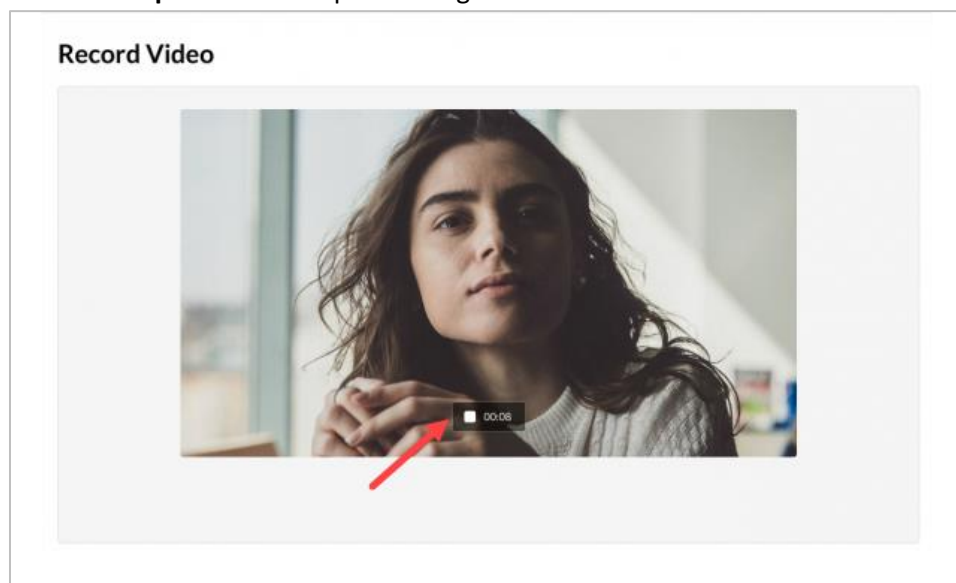

5. Click on the red Record button to begin recording. A 3-second countdown window is displayed.

CHROMEBOOK CAPTURE

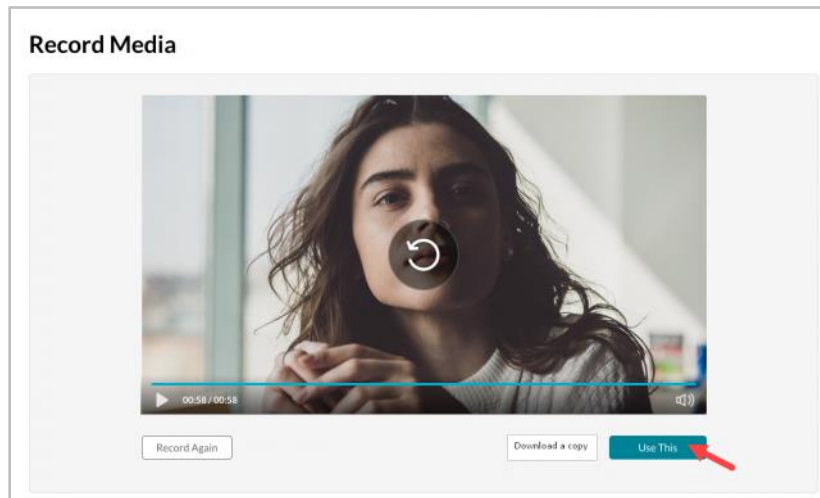

6. Click the **Stop** button to stop recording.

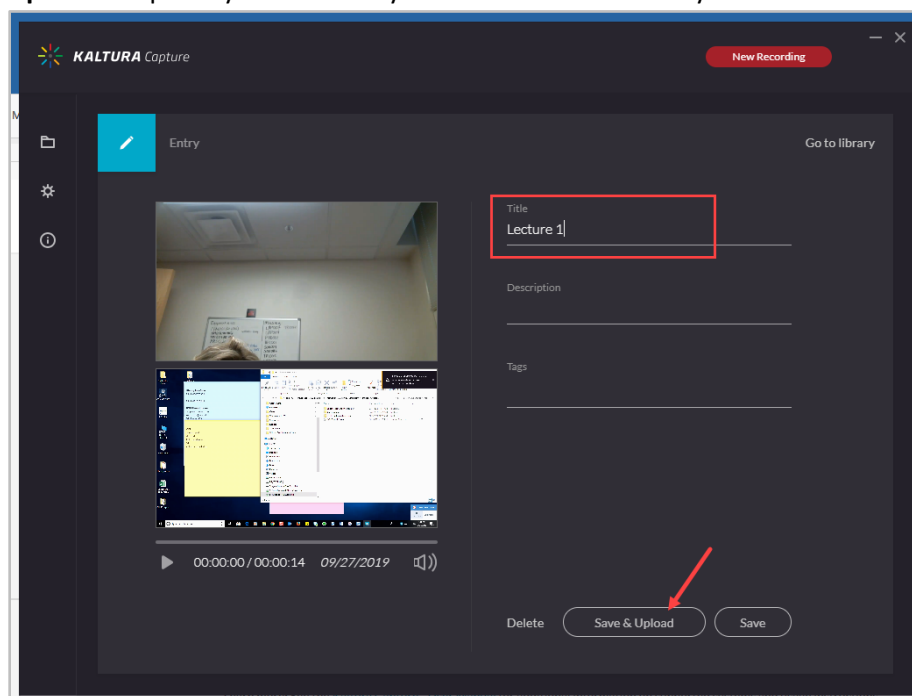

7. Choose **Record Again** to retake the recording or **Use This** to use the current recording. "Record Again" discards the current recording.

CHROMEBOOK CAPTURE

8. Rename your video in the **Title** box and add a **Description** or **Tags** if desired. Select **Save & Upload** to upload your video to your Kaltura Media Gallery.

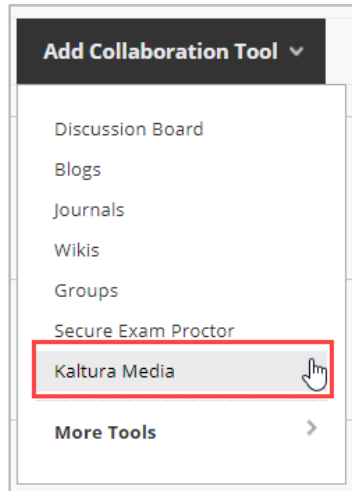

Note:

There may be a 5-10 minute delay until your video appears in the Kaltura Media Gallery.

CHROMEBOOK CAPTURE

- Return to the content area where you want to embed your video. Click the down arrow for Add Collaboration Tool and select **Kaltura Media**.

- Select the video to embed.

- Provide a title for the video and enter a description if desired. Click **Submit**. Your video now appears in your ulearn course.
