

EDIT A TURNITIN ASSIGNMENT

The new version of Turnitin (2022) requires that you make edits to Turnitin in two different places – the Turnitin interface for advanced options and the ulearn content area for the basics such as name, grade, visibility, and due dates. For making Turnitin edits after a course has been copied, [please visit this user guide](#).

Instructions

Editing an assignment in the Turnitin interface

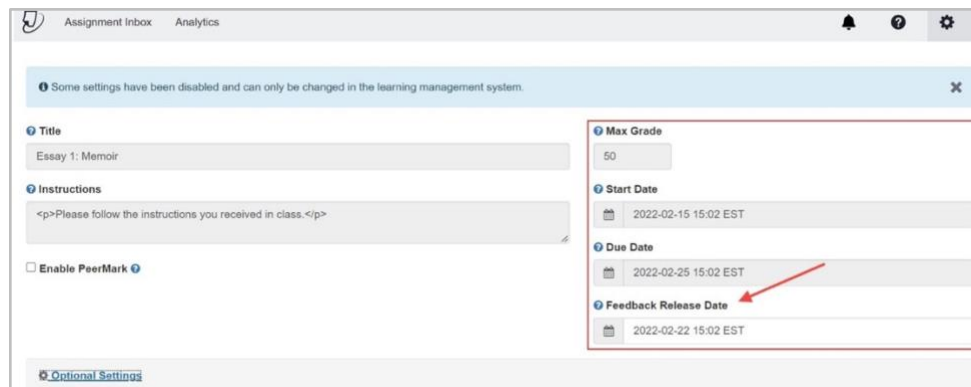

1. Go to the [content area](#) or folder and click on the **Turnitin assignment link** previously created.

2. On the Turnitin page, click the **gear** icon on the upper right corner of the page to access the Settings.

3. You will see a general edit page here, but you have very limited capabilities (i.e., you can only change the feedback release date for the assignment).

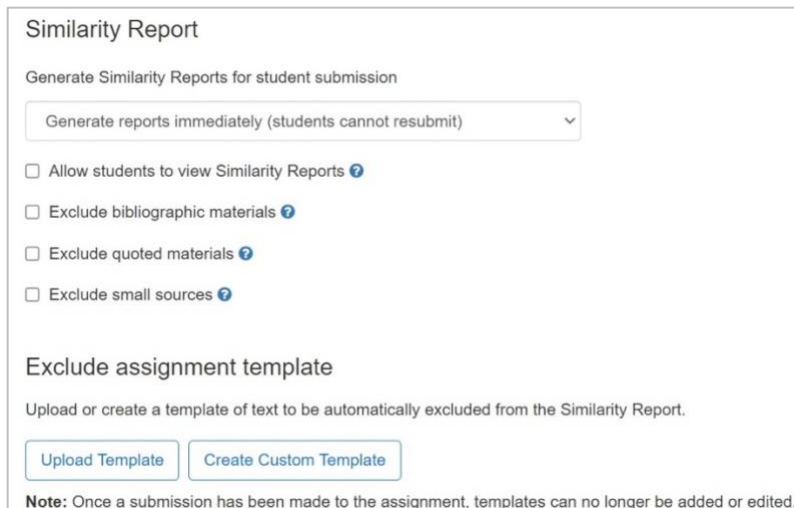

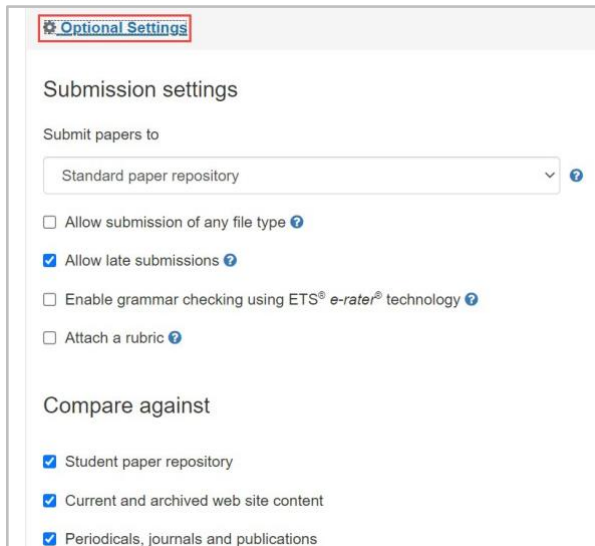

EDIT A TURNITIN ASSIGNMENT

In order to change the maximum grade, assignment release date, and the due date, you have to go to the assignment area in ulearn ([more on this process later in the guide](#)).

To edit the Turnitin start date and/or time, [click here for more information](#).

4. To access advanced editing options, scroll down and click **Optional Settings**.

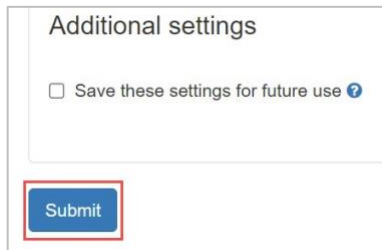

The similarity report options include student access and exclusion filters, and you can also upload or create a template for students to use for the assignment. The similarity report excludes the template's language from its analysis.

Note:

Once students submit a [template-based assignment](#), you cannot edit the existing template or add a new one to that specific assignment.

5. Before you finish, you have the option to save your settings for future use. Make sure to click **Submit** before leaving the page.
